

# Project Presentation

ApplicationSync Application

By Vishal Kokane

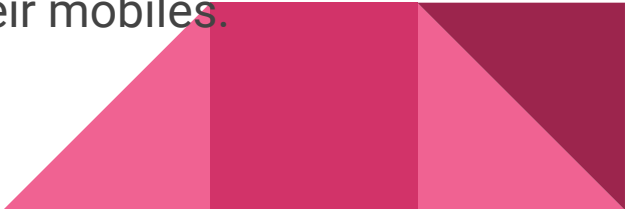

# Introduction

What this application is?

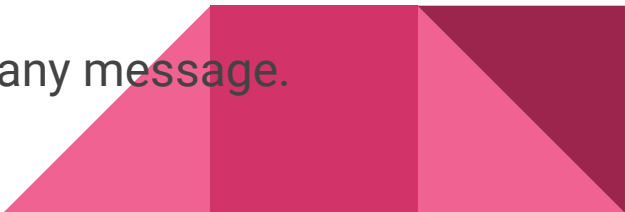

This is a application made to run concurrently, parallely with MacDonald's application.

This application only allows only true customer from getting benefitted from various kind of vouchers, sales, discounts and so on.

We capture mobile no. of customer and he will get notified about the sales, discount, new arrivals, promos through notification on their mobiles.

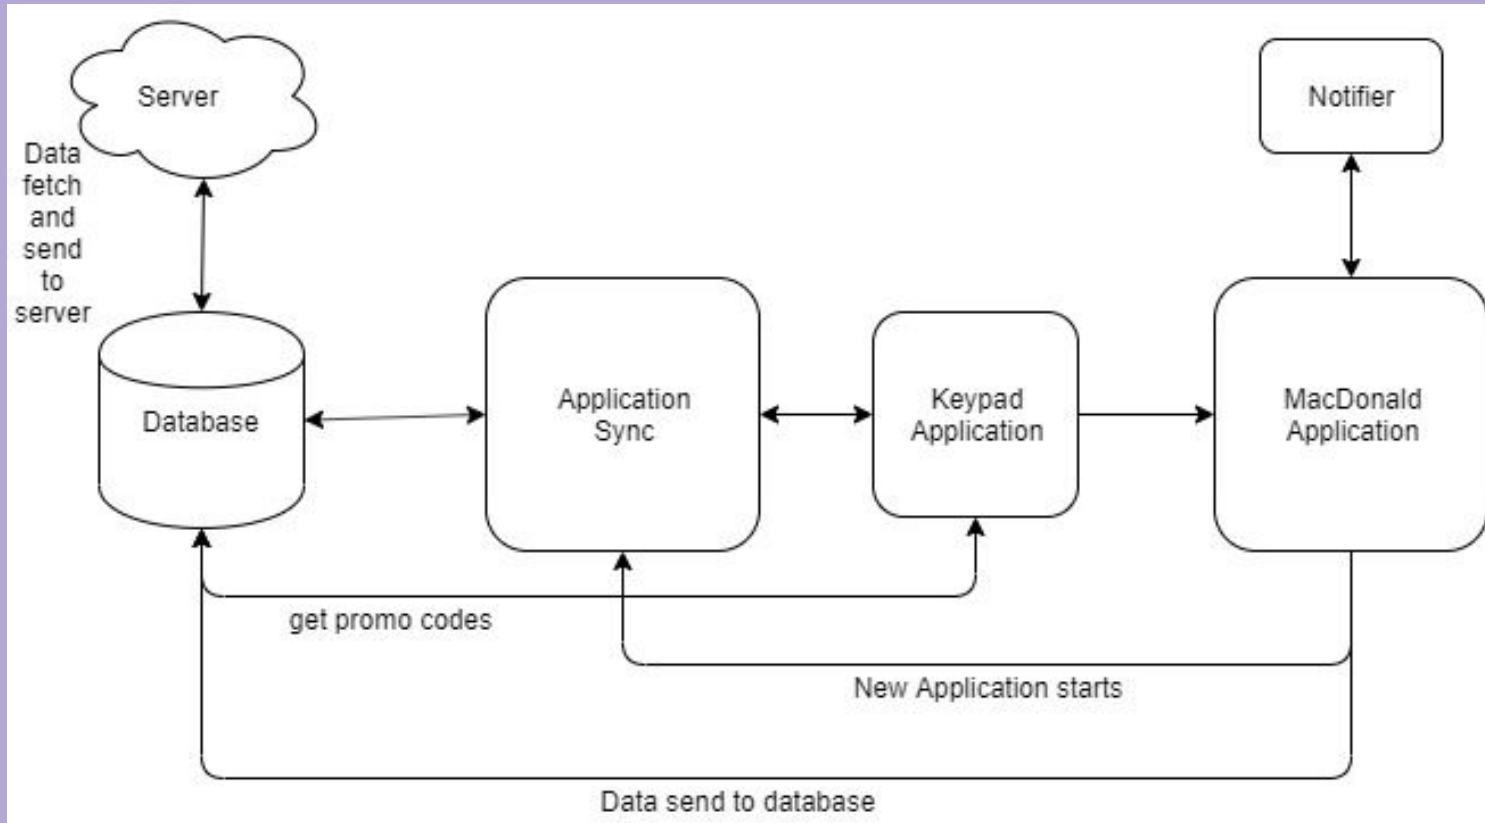

# How application works:

- We have to start ApplicationSync application. Then we'll start MacDonald's application.
  - After that we call MacDonald server to get data of promo codes for customers data from MacDonald server and store it in database.
  - Then Keypad application starts. Here we will take mobile no. of customer and in backend we'll fetch promos for that customer. and this promos will be validated with the promos he wants to apply.
  - If he/she is not eligible for promo; the message will get popup saying that he/she not applicable for the promo.
  - Otherwise the promo get apply successfully without any message.
- 

# How application works:

- Then after bill payment done, the bill details will save to database and then it will send to server by making group the bills which are not send to server.
- Server will send message to customer regarding purchase he did.
- After that again Keypad application will get started waiting for next customer to transact..

# Tables & Databases:

**Database Used:** Sqlite3

**Database Name:** ProductDB.db

## Table: PRODUCT\_PRICES

cid	name	type	notnull	dflt_value	pk
0	PRODUCTCODE	INTEGER	0		0
1	EATIN	TEXT	0		0
2	TAKEOUT	TEXT	0		0
3	OTHER	TEXT	0		0

## Table: CUST\_PROMOS

cid	name	type	notnull	dflt_value	pk
0	MOBILENO	TEXT	0		1
1	PROMO	TEXT	0		2
2	LIFE	TEXT	0		0

## Table: CUST\_ORDER

cid	name	type	notnull	dflt_value	pk
0	MOBILENO	TEXT	0		1
1	ORDERID	TEXT	0		2
2	STATUS	BOOLEAN	0		0

## Table: PRODUCTS

cid	name	type	notnull	dflt_value	pk
0	PRODUCTCODE	INTEGER	0		0
1	SHORT_NAME	TEXT	0		0
2	LONG_NAME	TEXT	0		0
3	DT_NAME	TEXT	0		0

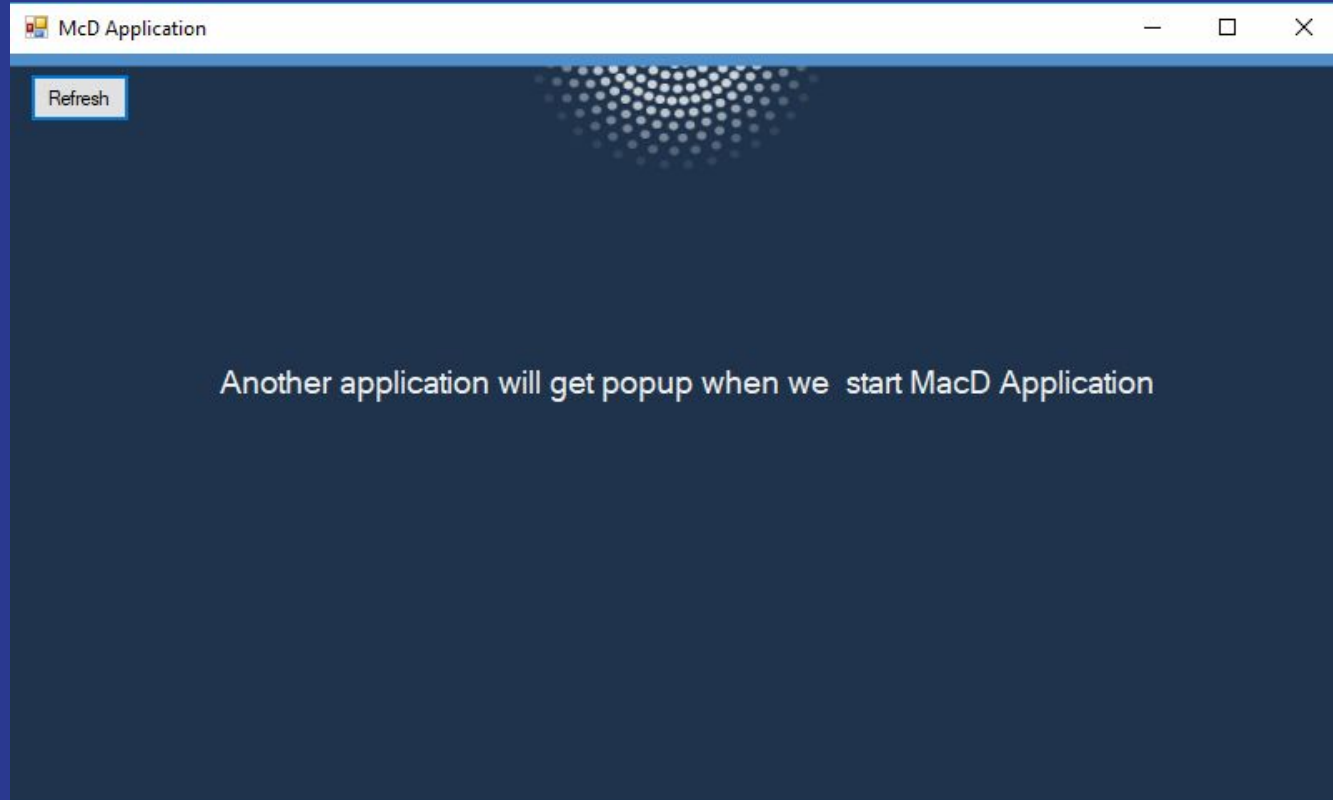

# Table: ORDERS

cid	name	type	notnull	dflt_value	pk
0	ORDERID	TEXT	0		1
1	TIME_STAMP	STRING	0		0
2	SALETYPE	STRING	0		0
3	NONPRODUCT	FLOAT	0		0
4	NONPRODUCT	FLOAT	0		0
5	TOTALAMOUN	FLOAT	0		0
6	TOTALTAX	FLOAT	0		0

# Table: ORDER\_ITEM

cid	name	type	notnull	dflt_value	pk
0	ORDERID	TEXT	0		0
1	CODE	TEXT	0		0
2	QTY	TEXT	0		0
3	TOTALPRICE	FLOAT	0		0
4	TOTALTAX	FLOAT	0		0
5	UNITPRICE	FLOAT	0		0
6	UNITTAX	FLOAT	0		0
7	BPPRICE	FLOAT	0		0
8	BPTAX	FLOAT	0		0
9	BDPRICE	FLOAT	0		0
10	BDTAX	FLOAT	0		0
